

BOISE PlansRoom™

ONLINE PLANS MANAGEMENT

NOW, MANAGE PROJECTS BETTER ONLINE:

BOISE PlansRoom™ is a management tool that lets you post projects online and manage them from inception through construction. Information is safe, with a multi-level permission system that limits access to authorized users at various levels. A constant birds-eye view gives you better oversight. BOISE PlansRoom is available at no cost when you build with Boise Engineered Wood Products.

SAVE TIME AND MONEY:

You won't have to pick up plans from the designer or waste time and money passing out extra copies to suppliers and subs across town. Plans are always available instantly, so there's no wasted time distributing revisions. And large plans that are too large to email can easily be posted and viewed online to save time.

ALWAYS HAVE CURRENT PLANS AVAILABLE TO TEAM MEMBERS:

With BOISE PlansRoom, all team members — you, the designer, dealer, subcontractors, product vendors or the homeowner have instant, anytime access to view current plans. Updates are made immediately, re-posted and team members notified by email to keep everyone on the same page and help eliminate costly errors.

DO TAKE-OFFS IN MINUTES:

With BOISE PlansRoom,TM you can do take-offs in minutes, not hours. Carpets, hardwood floors, countertops and other surfaces can be measured quickly and emailed to product suppliers for accurate, timely quotes.

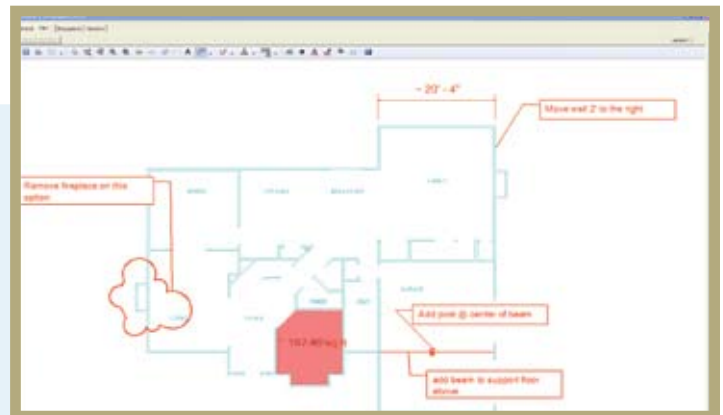

MARK UP AND COORDINATE CHANGES ONLINE:

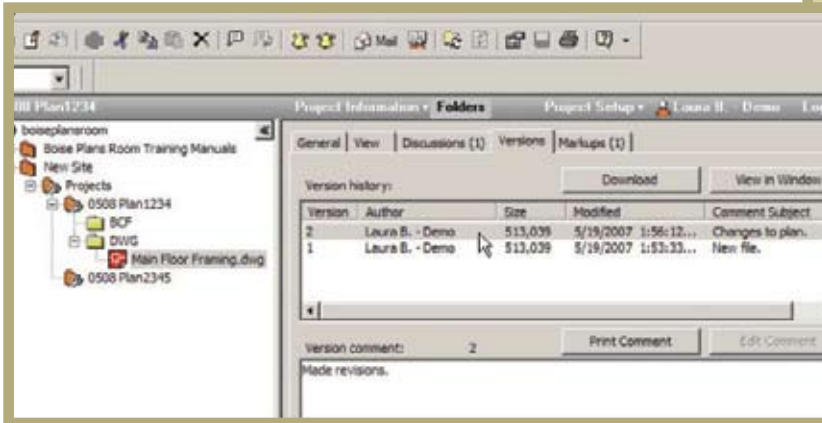

Plans can be marked up jointly with other team members. Decisions are faster and communication is better. *Want to add a fireplace or move a wall 2' to the right?* No problem. *Want carpet measurements for nine rooms?* Takes minutes instead of hours. BOISE PlansRoom is both a job expeditor and a communication tool for your business.

MAKE PLANS EASILY ACCESSIBLE USING OUR SOFTWARE ONLINE:

BOISE PlansRoom is simple to deploy, maintain, and use, with access anytime because only an internet connection and email address are necessary. Easy viewing and markup by all members of the extended project team without the need to own expensive design software.

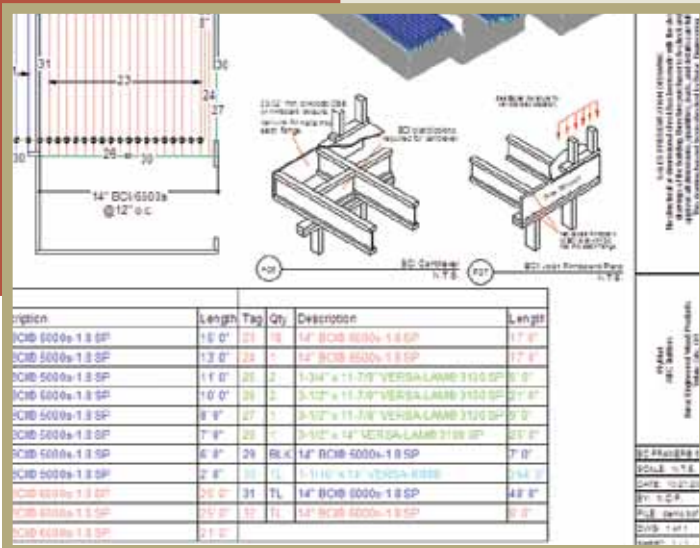

TRACK REVISIONS:

With BOISE PlansRoom™, all revisions are catalogued and archived for future reference. So now you can keep track of all revisions — when they were made, and who made them. *Which version of the plan is the most current?* You'll always know. *Who received each version?* It's there to view, enabling you to manage projects better than ever before.

SHARE YOUR PLANS SECURELY:

It keeps design information safe and secure with a multilevel permission system that limits access to authorized users at each level of security.

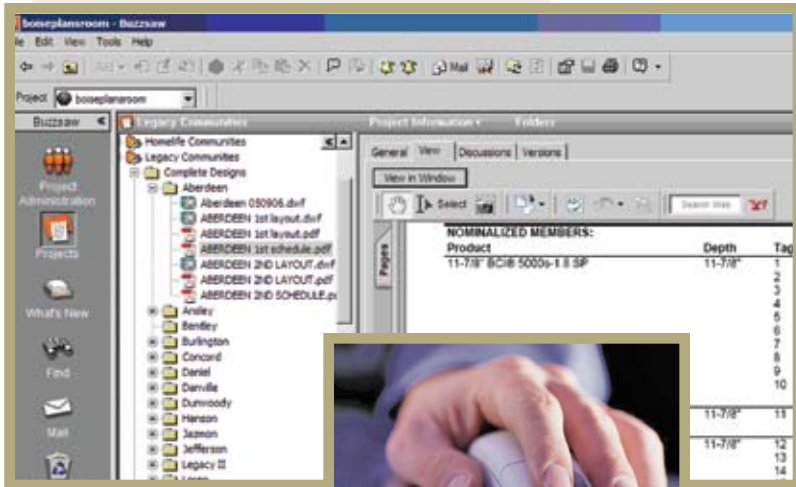

STANDARDIZE YOUR DOCUMENTATION:

BOISE PlansRoom also standardizes the way projects are managed, ensuring consistent documentation, common work practices and clearer, more easily understood communication.

RE-USE PROJECT TEMPLATES:

It's fast, enabling the re-use of standard project templates or "cloning" of complete projects updated with all changes and enhancements.

EASY TO USE:

BOISE PlansRoom™ is simple to deploy, maintain, and use. It's menu and folder-driven, with drag-and-drop plans. BOISE PlansRoom centralizes and standardizes the way projects are managed, ensuring consistent, standardized documentation over time.

LOTS OF SUPPORT:

Boise EWP offers thorough training programs, an 800# help desk, self-guided tutorials, and humans to talk with. It's Boise EWP's goal to help you be as efficient as possible and to get the most from this great new tool.

And BOISE PlansRoom is available through Boise EWP dealers at no charge for builders using Boise Engineered Wood Products. To learn more, visit bc.com/ewp or call 800-232-0788 to discuss how BC FRAMER® and BC CALC® work together to help you build better and more profitably.
