

Stronger. Smoother. Faster. Than Ever.

When it comes to particleboard, Boise has always been out in front. No other board has come close to its profit-producing performance. Until now.

Introducing Boise Select.

With an even finer core, even fewer voids, and an even tighter finish, you might wonder if this fully loaded board is actually Medium Density Fiberboard (MDF) in disguise.

Even better. Boise Select is a whole new grade of high-performance particleboard that will feed your need for speed—and quality.

Call today to take Boise Select for a spin. And fasten your seatbelt—because this board will take you places you didn't think particleboard could go.

www.bc.com/particleboard

This 3D sculpture was machined from a 2'x2' block of 100% Boise Select. If we can run a stock car this smoothly, imagine what we can do for your products.

Boise Select puts you ahead of the pack:

Holds tighter corners
379 lbs. face, 305 lbs. edge

Strengthens your track position
194 IBs

Runs cleaner emissions
nearly half the formaldehyde

Burns fewer tools
tools last up to 30 times longer

Accelerates throughput

Drives profitability
